### **DETAILED ACTION**

1. *A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 30 April 2007 has been entered. Applicants have now cancelled claims 2, 6-9, 15, and 18. Claims 1, 3-5, 10-14, 16, 17, 19 and 20 remain pending in this application and have now been allowed over the prior art of record.*

### **Response to Arguments**

2. *Applicant's arguments filed 30 April 2007 have been fully considered and found to be persuasive. The previous 102/103 rejections are hereby withdrawn in view of applicants' amendment to the claims and supporting arguments filed 30 April 2007.*

### **EXAMINER'S AMENDMENT**

3. *An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee. The amendment is made to correct obvious typographical and grammatical errors not affecting the scope of the claims.*

Art Unit: 2128

*Amend the claims as follows:*

*In line 5 of claim 1 change the word "including" to the word **includes**.*

*Line 5 of claim 1 should now read:*

*"operational description **includes** a plurality of parameters of the..."*

*In line 7 of claim 1 insert the word **and** before the word "the".*

*Line 7 of claim 1 should now read:*

*"development device, **and** the...."*

*In line 8 of claim 12 change the word "including" to the word **includes**.*

*Line 8 of claim 12 should now read:*

*"operational description **includes** a plurality of parameters of the..."*

*In line 11 of claim 12 insert the word **and** before the word "the".*

*Line 11 of claim 12 should now read:*

*", **and** the plurality of parameters being arranged...."*

*In line 8 of claim 20 change the word "including" to the word **includes**.*

*Line 8 of claim 20 should now read:*

*"...wherein the operational description **includes** a plurality of parameters..."*

*In line 10 of claim 20 insert the word **and** before the word "the".*

Line 10 of claim 20 should now read:

"...development device, **and** the plurality of parameters...."

**Allowable Subject Matter**

4. Claims 1, 3-5, 10-14, 16, 17, 19 and 20 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

Applicants are disclosing a computerized method and system for testing a development device by extracting device parameters from a product specification, storing the parameters in a testing data file, inputting the test file into a test bench (external to the device under test (DUT)) coupled to device, and subsequently testing the device. This has been disclosed in the prior art of record.

While these elements are individually disclosed in the prior art, the prior art of record does not meet the conditions as suggested in MPEP section 2132, namely:

"The identical invention must be shown in as complete detail as is contained in the ... claim." *Richardson v. Suzuki Motor Co.*, 868 F.2d 1226, 1236, 9 USPQ2d 1913, 1920 (Fed. Cir. 1989). The elements must be arranged as required by the claim, but this is not an **ipsissimis verbis** test, i.e., identity of terminology is not required. *In re Bond*, 910 F.2d 831, 15 USPQ2d 1566 (Fed. Cir. 1990)."

In particular, the prior art of record does not disclose the specific sequence of method steps or arrangement of system elements that includes receiving a product specification for the development device, the product specification including an operational description, a plurality of I/O requirements, a plurality of performance

parameters, a plurality of physical aspects, in combination with the operational description including a plurality of parameters of the development device including one or more parameters for at least one register in the development device the plurality of parameters being arranged in a predetermined first order includes arranging the one or more parameters for the at least one register in a table, the table including a header, the header including a register name, a register offset and a register type and wherein the table includes a row for each of a plurality of bits in the register and wherein each row includes a bitname and descriptive data field for each bit in the register, wherein the descriptive data field includes a bit type and one or more reset values; and subsequently extracting the plurality of parameters of the development device from the product specification, as now required by independent claims 1, 12, and 20.

The closest prior art uncovered during examination teaches certain limitations of the claimed invention as follows:

- U.S. Patent 7,103,860 issued to Price: teaches system for testing a development device by extracting device parameters from a product specification, storing the parameters in a testing data file, inputting the test file into a test bench (DUT) coupled to the device, and subsequently testing the device. However, Price does not explicitly disclose the additional combination of features where the operational description including a plurality of parameters of the development device including one or more parameters for at least one register in the development device the plurality of parameters being arranged in a predetermined first order includes arranging the one or more parameters for the at least one register in a table, the table including a header, the

*header including a register name, a register offset and a register type and wherein the table includes a row for each of a plurality of bits in the register and wherein each row includes a bitname and descriptive data field for each bit in the register, wherein the descriptive data field includes a bit type and one or more reset values; and subsequently extracting the plurality of parameters of the development device from the product specification, as now required by independent claims 1, 12, and 20.*

*The features noted above render the claimed invention non-obvious over the prior art of record. Dependent claims are deemed allowable as depending directly or indirectly from independent claims 1, 12, and 20 respectively.*

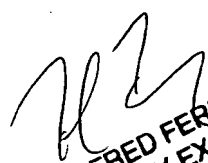

*Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."*
